

Paulina Medical Clinic

Mistletoe (Viscum) Cancer Treatment

General Guidelines to Fees

Item	Price	Comments
First Visit	\$300	Explanation of Mistletoe Paulina protocol; starting the basics of the therapy
Second Visit	\$200	Usually 1-2 weeks after first visit. Visit includes history and physical exam
Regular Follow Up visit	\$175	Follow ups can be \$150-\$200 depending on complexity and length of visit
Mistletoe Injections	\$140 every 2 weeks	Actual prices can vary slightly depending on the strength and type of the actual mistletoe recommended; shipment costs, etc - but this is the approximate cost to start
Mistletoe IV's	\$125 (add cost of mistletoe vials that the patient supplies for each IV)	Frequency depends on clinical condition: ranges from weekly to less often.
Vitamin C IV's	Start at \$150 and go up from here (depending on amount of Vitamin C, 25g, 50g, 75g)	Before IV's need labs reviewed and G6PD lab to see if you can do high dose vitamin c. G6PD lab cost \$65
Micronutrient lab testing	\$390	Tests for function of the immune system
Review of paperwork (if needed before treatment starts)	\$100	
Additional supplements	\$150 per month	Intended specifically for complementing the viscum therapy

Payment is expected at the time of the service. The only insurance we accept is the federal Medicare part B (this does not include advantage plans, HMO or PPO plans). Medicare part B generally covers the visits and some routine labs, but no other services or mistletoe costs, etc. Any other specialized labs are not included. We also accept Medicare Railroad plan.

A credit card is kept on file and all final prices will be discussed before a charge is made to the credit card with your approval.
